

COMPUTROLS / COMPACT

Overview

The **Computrols / Compact** combines an Intel Core 2 Duo computer running Computrols CBAS on Windows 7, with an industrial touchscreen monitor, a ruggedized steel keyboard/mouse, and a Computrols DDC controller all in a single, compact enclosure.

Enclosure Specifications

- » 21" x 30" x 8"
- » Powdercoated black finish
- » 20 - 0.5" to 0.75" knockouts
- » 7 - 1.125" double knockouts

Touchscreen Computer Specifications

- » Rugged aluminum magnesium alloy
- » 17" TFT LCD Panel supports 1280 x 1024 pixels
- » Intel Core 2 Duo Processor L7500 (4 MB cache, 1.6 GB, 800 MHz)
- » WiFi ready
- » 300cd/m2 brightness
- » High-quality stainless steel keyboard with trackball

Building Automation System

www.computrols.com

WiFi

The built-in computer has WiFi so you can log into the system remotely.

Optional Energy Monitoring

Monitor energy usage through a wireless network connection.

Touchscreen Control

Control CBAS through the touchscreen monitor with built-in computer.

DDC Controller Ready

Designed to work with Computrols 8-LX, 16-LX, 32-LX, or 64-LX DDC controllers or our legacy 8X, 16X, 32X, or 64X DDC controllers.

Pull-Out Keyboard

The stainless steel keyboard with rollerball mouse was designed to stand up to the most demanding environments.

Conveniently Compact

As the name implies, when the keyboard is tucked away, the Computrols / Compact only stands out eight inches from its wall mounts and the touchscreen is still accessible at all times.
